

Meeting 2 Minutes (04/19/2023)

Assume that everyone registering is a student and give admin access to people from the database perspective as an insert. Instead of adding the option to choose admin or student from the registration page.

Vicky finished the login/registration page and will work on the homepage for next week.

The home page will include the user's clubs like the Canvas page.

Ahmad finished the club's database and will work on the search and navigation for clubs next week.

Matt almost finished the reviews and will test it this week. Will implement the UI directly on the homepage so that users can review the clubs they are a part of. For next week Matt is going to work on the club signup page.

Vicky and Matt will implement the reviews functionality on the homepage together.
