

### **Meeting Log 3**

Got a working website, now we have to fix some bugs.

We have decided that the home page will also be the profile page. Victoria is in charge of this.

The reviews are still in progress and the search and sort is completely done. Matt is in charge of this.

The edit functionality for admins is completely done. Grayson finished this.

There was some redundant work done, with the search function being done by both Grayson and Ahmad. There was some miscommunication that has now been resolved. The main issue is that the search functionality wasn't even on the board.

Grayson is now in charge of making the page to add a club to the database.

Matt is in charge of the join club functionality.

Ahmad will mainly work on the project presentation slides and fixing some bugs.
