Meeting Log 4

This meeting was different, at first we were given instructions on what the presentation slides should have and what the architecture diagram entails. We also got some tips on how to make the presentation. We were also told that we should have a demo recorded in case we run into issues during the presentation.

Then we showed the demo of our working website and were told it looked great. It had some minor issues like the join button showing up while already being part of the club. We got some recommendations on how to make the website prettier.
